

The Unger Visual Color Coding System

Quality Tools for Smart Cleaning™

SmartColor™ Cleaning
Preventing Cross-Contamination

ungerglobal.com

Increase Productivity & Improve Hygiene

Every facility is unique, which is why the Unger SmartColor™ Cleaning System is the first visual color-coding system designed to designate specific cleaning zones. This system allows facility managers and workers the ability to organize equipment and prevent cross-contamination between work zones (example: using restroom mops in restroom areas only, not in public/food prep areas). The results are improved performance, better sanitation and cleaner facilities.

What is the Purpose of Color Coding?

Unger's microfiber mops and pads are part of our SmartColor™ Cleaning System that combines superior technology with the productivity and sanitation benefits of visual coding.

RESTROOMS
HIGH-BACTERIA AREAS

SPECIALITY AREAS
LABORATORIES/GYMNASIUMS

BREAK ROOMS/KITCHENS
FOOD SERVICE AREAS

GENERAL AREAS
LOW-RISK BACTERIA AREAS
OFFICES/LOBBIES/CLASSROOMS

The Advantages of Color-Coding

The SmartColor™ system is an intuitive visual coding system, reducing language and literacy barriers when training a diverse workforce in proper cleaning procedures. Color-coding also provides supervisors with quick visual indicators for monitoring employee activity to prevent tool and chemical misuse.

PREVENTS CROSS-CONTAMINATION

Distinct color-coding makes it easy to separate tools into their correct areas of use or cleaning task reducing bacteria cross-contamination between high and low-risk areas.

ENHANCES BUILDING SAFETY

Color-coding reduces risk of accidents arising from the misuse of tools or chemicals in the wrong area.

SIMPLIFIES SUPPLY MANAGEMENT

By keeping cleaning tools in their proper areas, SmartColor™ allows custodial departments to keep track of their equipment and supplies.

DETERS CHEMICAL MISUSE

SmartColor™ reduces the transfer of harmful substances by isolating potentially hazardous cleaning chemicals into their appropriate areas.

ELEVATES EMPLOYEE PERFORMANCE

SmartColor™ enhances the professional appearance of employees and increases their efficiency by making it easy to organize the cleaning process.

SmartColor™ Product Zone Designation

There are two different ways to designate Unger tools with the SmartColor™ Coding System: stickers that adhere to the product, and product color.

STICKERS

SmartColor™ Color Coding Stickers

Unger's line of SmartColor™ cleaning products includes a set of stickers used to designate the cleaning zone that tool is to be designated to.

It is best practice to pair the appropriate cleaning tools together (dual bucket/ mop handle/microfiber mop) when cleaning as well as storage.

Mismatching these tools can cause cross-contamination of soil and chemicals throughout the facility.

PRODUCT COLOR

SmartColor™ Mops and MicroWipe™ Microfiber Cloth

Unger's line of SmartColor™ mops and microfiber cloth are specifically colored to perform tasks in designated areas.

When using color-coded mops, be sure to use a mop handle (as well as any other Unger cleaning tools) that are also color designated to the same area.

UNGER EXCELLA™

Unger Excella™ Restroom Cleaning Pad

Unger Excella™ Floor Cleaning System

Unlike other mop systems that are part of the SmartColor™ color coding system, the Unger Excella™ Cleaning Pads are available in only one mop color (gray).

Designate the cleaning zone color for the cleaning pad by removing/cutting off the undesired colors.

The Unger Excella™ line of cleaning pads also includes the Restroom Cleaning Pad which does not have color coding tag, but features a red colored seam to indicate restroom use only.

SmartColor™ Cleaning with the SmartFit™ Floor Squeegee

Unger's line of floor squeegees includes the SmartFit™ which locks onto any shape, any diameter of standard handles including straight, tapered, thread and non thread tips.

Each style of SmartFit™ squeegee can be used for a variety of floor surfaces and all include the SmartColor™ chips to designate a designated cleaning zone.
