Traditional floor mopping systems lack the ability to truly clean given their outdated design features, leaving dirt and infectious germs behind that work against your efforts to produce a cleaner facility. At Unger, we create groundbreaking innovations in floor care, including commercial floor cleaning and floor finishing solutions designed to meet the unique needs of your facility and specific cleaning procedures.

Our comprehensive selection of floor maintenance equipment supports the cleaning of all hard surfaces, including hardwood, vinyl, porcelain, ceramic tile and more.

**Microfiber Flat Mops vs. Cotton String Mops**

Black light experiment reveals the advantages of using microfiber flat mops vs. cotton string mops

- **COTTON STRING MOP**: Cotton string mop pushes dirt around
- **MICROFIBER FLAT MOP**: Microfiber flat mop absorbs dirt
THE ADVANTAGES OF COLOR-CODING:
Improves Training and Communication • Prevents Cross-Contamination
Enhances Building Safety • Deters Chemical Misuse
Simplifies Supply Management • Elevates Employee Performance

Every facility is unique, which is why the Unger SmartColor Cleaning System is the first visual coding system designed to adapt to the specific, and changing, needs of your business. As your building’s footprint grows or personnel needs fluctuate, SmartColor will keep your business ahead of all its cleaning demands.

SmartColor achieves its distinct color-coding through interchangeable features and durable metallic decals. This gives you the flexibility to easily retask tools for different areas or functions as required.

Use the color-coded stickers to identify which products are to be used in which areas of a facility.
Unger Dual-Bucket Cleaning System

Hygiene is a priority, so Unger designed a dual-compartment bucket, isolating dirt and maximizing usage of cleaning solution.

Keep floors cleaner and safer than ever with Unger’s selection of floor cleaning tools. Choose from a wide selection of microfiber flat mops, pads, and string mops that can handle even the toughest jobs.

To get the most out of a microfiber mop, begin by outlining the space to be cleaned. Then, starting in the corner furthest from the exit, walk backwards creating an overlapping “S” motion with the mop. Adjusting the height of the mop to the individual user is important to avoid strain and maintain proper form.
