WINDOW CLEANING

At Unger, the window cleaning industry is both where the company started and where we continue to be a world leader. Starting with founder Henry Unger's desire to create a better squeegee, Unger has built a reputation of creating the highest quality, most innovative tools available.

Products such as the HydroPower Ultra and the Generation 2 nLITE demonstrate that today, and moving forward, quality and innovation remain core values of Unger.

Pure Water Cleaning

What is pure water?

Pure water is water that has been treated and any dissolved, solid particles have been removed from it. With pure water, there is no need to wipe or polish the glass, the water dries streak free leaving your windows spotless.

Pure water cleaning is not just eliminating the need for lifts and ladders making it safer, it eliminates the need for detergents, making it environmentally safe as well.

The **Unger HydroPower** systems are designed to be the perfect fit for professional cleaners. They are engineered to be portable, easy to operate, and extremely efficient.

HYDRO POWER[®] RO SYSTEM

Reverse Osmosis (RO)

Reverse osmosis is the process of removing impurities (technically, ions) from water by forcing it through a filter (referred to as a membrane).

HYDRO POWER[®] ULTRA

Deionization (DI)

Deionization is the process of removing positive metallic ions (impurities) and replacing them with hydrogen and hydroxyl, respectively forming pure water. This process removes up to 99% of all the sediment and minerals which creates impurity-free water.

Unger Pure Water Cleaning System

The Advantages of Water Fed Poles
Clean & Efficient + Cost Savings
Environmentally Friendly + Safety

BOOST MODE!

Cleaning with pure water can be achieved at minimal running cost – especially in hard water areas. The RO pressurizes water through a 3-stage filtration process, resulting in water with a particularly high cleaning efficiency that will leave surfaces without streaks. Featuring a boost function, you can remove dirt and debris that cannot be removed with a brush.

Expert Tips - How Professionals Scrape

- Check if glass is scratch-resistant and suitable for scraper use
Unsuitable glass surfaces include: plexiglass, crown glass, solar glass, and safety glass (ESG)
- Always follow the manufacturer's instructions
- Perform a scrape test in advance on a small section
- Before starting, check the glass for any damage and report it, if necessary
- Check the blade for damage and change or reverse it
- The surface to be scraped should always be wet
- It is best to use a releasing agent, such as EasyGlide Glass Cleaner
- Scrape in one direction. Never pull the scraper back, as this may cause scratches

TelePlus Pole System

A flexible, modular pole system available in 2- or 3-section starter units, with 6-foot extensions. The TelePlus system enables you to easily reach heights from 12 to 30 feet and allows you to only carry the sections you need.

The poles, made of drawn anodized aluminum, are light and can be handled easily and safely, even when assembled, to provide a maximum reach.

Customize Your System:

Plus 3
Extends the basic 2-section pole

Plus 4
Extends the basic 3-section or Plus 3

Plus 5

SURFACE CLEANING

Whether in schools, restaurants or other public spaces, dirt, debris and virus-laden droplets can remain infectious for several hours on surfaces. Viruses generally remain active longer on stainless steel, plastic and similar hard surfaces, making frequent surface cleaning imperative to limiting the spread of potentially harmful germs.

Unger offers an array of surface, table and desk cleaning tools designed to minimize the spread of infectious diseases by removing impurities before the disinfecting process.

**Stay organized and fully equip
when using your cleaning cart.**

Scan here for more information.

The best way to clean is with an efficient system, and the Unger RestroomRx is the first janitorial cart developed as a completely coordinated system by cleaning professionals.

Every detail is designed for ergonomics and safety. Tools stay organized and securely fastened in place while moving from job to job.

The Unger RestroomRx streamlined cart systems will enable your custodians to work faster and more productively than ever.

▶ **EASY TO MANEUVER**

The handrail allows you to maneuver the cart in and out of restroom entrances quicker and easier.

▶ **STAY ORGANIZED**

Every tool in the system has a designated position on the cart. Tools are always where they need to be, and always clipped on securely.

▶ **LARGE STORAGE**

With an expanded storage module, you'll minimize trips to the supply closet.

▶ **SMART DESIGN**

The narrow tool tower design allows all tools to remain within the boundaries of the cart. The base of the cart also acts as a drip tray catching excess liquid, so nothing ever drips on restroom or hallway floors.

70% Savings on Chemical and Water Usage!

SAFETY

The Ergo Rail eliminates poor posture. No matter which side of the cart you're on, it can be pushed and pulled with ease.

The handrail allows you to maneuver the cart in and out of restroom entrances quicker and easier.

Patented clip system ensures all tools have an identified position on the cart. Tools are securely in place while you are moving down the hall. No bending or reaching to get tools out/off of the cart.

EFFICIENCY

The Storage Module eliminates restroom complaints. The effort it takes to return to a supply closet to restock supplies can waste more than just time.

With an expanded storage module, you'll minimize trips to the supply closet. Even eliminating one trip increases productivity.

The patent pending Narrow Tool Tower design allows all tools to remain within the boundaries of the cart. Since no tools hang over the outside edge of the cart, getting through tight doorways is easy.

CLEANLINESS

From the Dual Bucket to the Telescopic Dustpan, the tools that comprise the system were developed to deliver optimal productivity and cleaning results.

A patent pending Drip Tray keeps dripping from tools off the floor, and delivers ultimate bucket stability, even when going over curbs or thresholds.

THE ADVANTAGES OF COLOR-CODING:

Improves Training and Communication • Prevents Cross-Contamination

Enhances Building Safety • Deters Chemical Misuse

Simplifies Supply Management • Elevates Employee Performance

Every facility is unique, which is why the Unger SmartColor Cleaning System is the first visual coding system designed to adapt to the specific, and changing, needs of your business. As your building's footprint grows or personnel needs fluctuate, SmartColor will keep your business ahead of all its cleaning demands.

SmartColor achieves its distinct color-coding through interchangeable features and durable metallic decals. This gives you the flexibility to easily retask tools for different areas or functions as required.

Use the color-coded stickers to identify which products are to be used in which areas of a facility.

Floor Mopping

Keep floors cleaner and safer than ever with Unger's selection of floor cleaning tools. Choose from a wide selection of microfiber flat mops, pads, and string mops that can handle even the toughest jobs.

To get the most out of a microfiber mop, begin by outlining the space to be cleaned. Then, starting in the corner furthest from the exit, walk backwards creating an overlapping "S" motion with the mop. Adjusting the height of the mop to the individual user is important to avoid strain and maintain proper form.

100% SATISFACTION GUARANTEE

We design and build our tools to be tougher than the dirt they clean. We stand behind everything we make, 100%.

If for any reason you're not satisfied with an Unger tool, please return it to us within two years of purchase and we'll make it right.

Here's how:

Mail the item back to us at the address listed below along with a completed 100% Satisfaction Guarantee Form.

Unger Enterprises, LLC
 Attn: Customer Satisfaction
 650 Long Beach Blvd.
 Stratford, CT 06615

We will replace the item with a comparable item based on style, functionality, and price. Please allow 4-6 weeks for processing. To help ensure fairness to all customers, we do require a receipt in certain situations. Please see our Special Conditions for details.

Special Conditions

To help protect our customers and make sure every return or exchange is dealt with fairly, in certain situations we may either require a receipt or decline a return or exchange, including:

- We can't accept items for return that were not purchased directly from an Unger authorized distributor.
- If an item has a missing label or it has been defaced, we can't accept it for return without a receipt because we can't be certain it was purchased directly from an Unger authorized distributor.
- On rare occasions we may find it necessary to require a receipt for returns and exchanges based on the nature of prior transactions.
- For the safety of our employees, we can't accept items that have been soiled or contaminated until they have been cleaned.
- Normal wear and tear is not covered by the guarantee.
